

## Star Cleaning, USA

**...offers state-of-the-art GPS tracking on its parking area and street sweeping fleet.**

**Star Cleaning, USA monitors and analyzes nightly sweeping performance with Global Positioning Satellite (GPS) systems mounted on-board each of its parking lot sweepers.**

**Both Star Cleaning, USA and its customers receive many benefits from our operation of GPS-equipped sweepers. Routine analysis and other available information include:**

- 1. Nightly arrival and departure times for each property being swept.**
  - a. This feature allows us to be sure adequate time is allotted for thorough sweeping of your property. We also analyze this data on a routine basis to ensure your pricing is correct for your property. Over time, we have adjusted rates both up and down as a result of our GPS tracking.
- 2. Sweeper speeds while on the property.**
  - a. We are able to ensure proper speeds are followed for optimum pickup performance.
  - b. Monitoring provides ongoing compliance with our company safety program.
- 3. Sweeper path over the property.**
  - a. To ensure front, sides and rear of property are adequately swept.
  - b. An 'electronic bread crumb trail' details the sweeper's path across each property.
- 4. Sweeper stops/durations at all locations at each shopping center.**
  - a. This ensures work proceeds diligently and responsibly so that all scheduled areas are serviced.
  - b. Provides oversight to ensure that special services are provided, e.g., all trash cans are relined.

**Star Cleaning, USA consistently maintains dependable, exceptional service by combining our onboard sweeper GPS system with manager on-site inspections. Our professionally designed system allows us to meet — and exceed — the standards that are desired by our customers and required by our management team.**

***“You can always count on our high level of service.”***
